

## Sulfuric Acid Process Stream

### Product Stewardship Summary

#### Chemical Identification

- Chemical Abstract Service (CAS) Number: 7664-93-9 and process salts (see SDS)
- Chemical Name: mixture

#### Description of Sulfuric Acid Process Stream

Sulfuric Acid Process Stream is a yellow liquid for industrial use. It is packaged by FutureFuel Chemical Company in bulk quantities.

#### Properties of Sulfuric Acid Process Stream:

- Yellow liquid
- Flash Point >140°C
- Acid odor

#### Safety & Health Information of Sulfuric Acid Process Stream:

Normal safe handling procedures should be used in the workplace. Workers should follow recommendations of Safety Data Sheets (SDS). Consumers are at little risk of being exposed to Sulfuric Acid Process Stream under normal conditions of use. The following describes health effects from exposure to Sulfuric Acid Process Stream:

- Skin Contact: Causes severe skin burns
- Eye Contact: Causes serious eye damage
- Inhalation: May cause irritation to respiratory system.
- Ingestion: May cause burns to digestive system

Sulfuric Acid Process Stream is suspected of damaging fertility or the unborn child.

Before neutralization, the product may represent a danger to the aquatic environment.
